

**Customer:** Harley-Davidson  
Motor Company

**Location:** Kansas City

**Project:** Post-Production Portable  
Test Cell (PET)

### Project Information

Post-production motorcycle PET dynamometer load test cell for checking power, emissions, etc., of a motorcycle engine prior to shipment. The stand is fully automatic and monitored from a separate control room. A fully instrumented test cart allows the operator to dress the engine prior to arrival at the test cell for improved throughput.
